## **REASONS FOR ALLOWANCE**

### ***Allowable Subject Matter***

1. Claims 1-43 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach a method and system including a traffic beam forming circuitry operable to provide a plurality of traffic beams formed from a same signal; common use beam forming circuitry operable to provide a common use beam formed from said signal; and beam analysis circuitry coupled to said traffic beam forming circuitry and said common use beam forming circuitry wherein said beam analysis circuitry operates to analyze each traffic beam of said plurality of traffic beams with respect said common use beam.

Eswara et al. (6,597,927), cited in the last office action discloses a system that uses a common beam to set up calls that use a narrower beam. Therefore, Eswara is disclosing a similar invention. Eswara, however, is using the common beam as a control channel to send setup data, and therefore, fails to teach beam forming circuitry wherein said beam analysis circuitry operates to analyze each traffic bema of said plurality of traffic beams with respect said common use beam.

Therefore claims 1-43 are allowed.
